Subject: RE: Air Program Hot issue for Davis Refinery

Hi – Our modelers have reviewed the modeling and should be able to address questions you might have. ND had not yet reviewed the company's modeling when we spoke last month. Here's what I have on the modeling from my notes from the last meeting. ND has been focusing on getting the emission rates ironed out first and then plan to do some of their own modeling. They plan on redoing the met data rather than relying on the company's and will be modeling for criteria pollutant increment and SILs analyses. They will also look at doing visibility modeling. John Notar was on the call and advised ND to start with VISCREEN for that. Rebecca agreed to check in with OAQPS regarding what version of Appendix W they should use – ND is thinking they should use old version since that is what was initially submitted by company before the revision to App W came out. Rebecca was suggesting during the meeting that if there was a way to support using the 2017 version that would be better.

Thanks for the notes and hot issue. I do have a question on the modeling that was mentioned in the notes. I will follow up with Rebecca or Gail T.

Carl Daly, Deputy Assistant Regional Administrator

Office of Partnerships and Regulatory Assistance
